DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-60 are rejected under 35 U.S.C. 102(a) and (e) as being anticipated by Fang et. Al., U.S.P. No.6,504,963.

Fang et. al. 963' teaches (Figs.1-15) a connection protection mechanism (and method for using same) for an optical cross-connect switch comprising: an optical cross-connect switch 100

Art Unit: 2874

to couple to client equipment wherein the optical cross-connect switch is bi-directional and includes both working and protection ports W1P1,W2,P2..ect. connected to client equipment with the client equipment including at least a pair of working links and/or protection links wherein a testing signal or tone can be used to indicate connection failure and re-route around the failure with the client equipment including optical wavelength multiplexers/demultiplexers, SONET, add/drop devices, routers, ect. with the client including optoelectronic detecting means and I/O ports, which clearly, fully meets Applicant's claimed limitations.

A copy of PTO-1449 will be included in this office action.
